## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-24, 71 and 72, drawn to an herbicide tolerant *Brassica juncea* plant and a method of use, classified in class 800, subclass 276, for example.
  - II. Claims 25-60, drawn to an herbicide tolerant *Brassica juncea* line designated 98SJ-23841, an herbicide tolerant *Brassica juncea* line designated 98SJ-23844, or an herbicide tolerant *Brassica juncea* line designated 98SJ-23845 and a method of use, classified in class 800, subclass 266, for example.
  - III. Claims 61-70 and 73-77, drawn to a method of producing herbicide tolerance in *Brassica juncea* using an interspecific cross, classified in class 800, subclass 269, for example.
  - IV. Claims 78 and 79, drawn to a method of transferring a mutagenic trait involving mutating a *Brassica* sp. other than *B. juncea*, classified in class 800, subclass 276, for example.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2)

Art Unit: 1638

that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claimed Brassica juncea plant can be tolerant to an herbicide other than imidazolinone or sulfonylurea herbicide. The subcombination has separate utility such as a crop plant or a source of DNA.

3. Inventions I and II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the produce of Group I can be made using a materially different process than that of Group III, and the process of Group III can be used to make another and materially different product than that of Group II.

4. Inventions I and II and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process of Group IV can be used to make another materially different product than that of either Group I or Group II.

5. Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the

Art Unit: 1638

different inventions because the methods of Group III and IV have different method steps, different starting material, and can make different products.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter, and because the search required for one of the groups is not required for another, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete within one month (not less than 30 days) must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
